Course overview

Are you ready to elevate your understanding of corporate governance? This training course will help you understand what corporate governance is, how it has evolved over time, its purpose and how you can use it to build a more effective, productive and stronger organisation, which is key to every organisation's success.

Whereas law and regulation can be seen as the 'what', governance is the 'how' and, as it is all about people and how they interact, it is applicable to all organisations. This training course will bring you up to date with the latest thinking and best practice so you're equipped to take your business to the next level.

The expert trainer will examine the intricate relationship between governance, corporate culture, ethics, and various stakeholders, providing a holistic view of how these elements interplay to drive business success. This course will clarify the purpose of corporate governance and its importance in effective decision-making. By expanding your knowledge of fundamental governance concepts and the frameworks that underpin them you will gain a solid foundation to build on.

If you work with boards, support meetings or are involved in the decision-making process in your organisation, this is the course for you.

Reviews

The speaker was engaging and informative - answer[ing] all questions posed in a clear manner, also tailored the training to the group. The pace was well suited to the level of understanding - for example, cover[ing] some topics that were not applicable to our organisation in lighter detail, and spending more time on the areas that were applicable to us. Overall, the content was well pitched and I found I met my intended objectives.
