Effective Change Management in Pharma

10 October 2025
+ 17 April 2026

Master pharmaceutical change control processes in just 1 hour. Learn GxP compliance, change categories, and regulatory requirements for quality professionals.

Format:
Live online

CPD:
1 hours for your records

Certificate of
completion

Course overview

Managing change control is a crucial element of the pharmaceutical quality management system, as it can impact product quality or regulatory filings. Changes made during pharmaceutical manufacturing and supply operations must be effectively controlled and documented to ensure that their impact, even if minor, is fully understood and addressed.

Maintaining compliance with GxP requirements, change control helps keep processes and systems in a validated state. An effective change control system also ensures consistency in products and services for consumers while demonstrating commitment to regulatory agencies.

This course will explore the crucial steps involved in effectively controlling changes during pharmaceutical manufacturing and supply operations.

Benefits of attending

- **Expand** your knowledge of change management in pharmaceutical industry
- **Understand** the different categories of changes with examples of pharmaceutical manufacturing and supply operations
- **Master** how to effectively manage and document a change
- **Get up to date** with industry best practices and regulatory requirements for change management

Who should attend

This course is ideal for professionals in the following industries:

- Pharma
- Biotech
- Medical Devices
- Life Sciences (especially those handling technical changes)

Additionally, it is well-suited for professionals in these industries who want to understand the fundamentals of change control and its impact on products and business. It is also beneficial for anyone interested in staying updated on the latest regulations and industry trends affecting pharmaceutical change management.

Programme

Introduction to change control

- Importance of controlling changes
- Change control process

Types of changes

- Change categories
- Examples from manufacturing and supply changes

Industry regulations and best practices

- Regulatory requirements
- Best practices

Presenter

Gurpal Singh

Dr. Gurpal Singh is an experienced Pharmaceutical Quality Management professional with more than 25 years of experience and a history of success in QA operations management, Quality systems implementation and Continuous improvement. He previously worked in global quality assurance roles within large pharmaceutical companies like MSD and Novartis where he led various quality projects and QA initiatives ensuring compliance with international GxP and regulatory requirements. Gurpal holds a doctorate in Chemistry from Magadh University of India and holds professional certificates in Six Sigma, Quality Auditing and Business Management. He is also a member of International Society of Pharmaceutical Engineering.
