### Course overview

Commercial contracts are legal tools that secure your organisation's interests – if they are drafted well. Skilled drafters can structure terms that optimise outcomes - such as payment terms, IP ownership, termination triggers and limitations of liability - while protecting against adverse conditions.

Business is founded on the crystallisation of the terms of a deal and clarity and fair construction are the key to a successful commercial agreement. Without a clear agreement, commercial and legal disputes are likely, and unclear agreements are one of the largest causes of costly commercial litigation.

In today's fast-paced commercial landscape, lawyers and contract professionals must be equipped to draft, negotiate and interpret contracts with precision, clarity and strategic foresight. This three-day practical programme provides a comprehensive and immersive experience for those seeking to strengthen their skills in drafting robust, enforceable contracts and interpreting key provisions with commercial and legal insight.

Through a combination of in-depth instruction, practical drafting exercises, interactive case studies and peer discussion, delegates will gain the tools to manage risk, enhance legal certainty and add strategic value through well-structured agreements.

This 3-day modular, comprehensive programme focuses on delivering practical and applied training of the key drafting skills needed to create transparent and direct contracts that deliver on a legal and commercial level. Each section of the course builds on the section before so all those dealing with contracts can gain the skills to draft watertight clauses, navigate complexity and proactively manage risk for the benefit of their organisations.

Key topics covered include:

- The legal principles behind contract interpretation
- Differences between civil and common law drafting styles
- · How ambiguity is treated by courts and the impact on enforcement
- · Classical and modern approaches to contract formation, including key case law
- Avoiding unintended contract formation during negotiation
- Precise language for key clauses: shall, will, endeavours, warranties, representations, and indemnities
- Strategic drafting techniques for limitation and exclusion of liability clauses
- Risk allocation spectrum and how to reflect this in your drafting
- Transfer of contractual rights: assignment, novation and third-party rights
- Governing law, jurisdiction, and dispute resolution clauses with cross-border implications
- Boilerplate clauses using a functional methodology
- Entire agreement clauses and their role in contract enforcement
- The role of interest, payment terms and remedies in balancing contract performance

### Practical interactive learning style

Throughout the programme the expert presenter will use a balanced mix of theory, practical group exercises, discussion sessions, sample clauses and case studies to provide you with a comprehensive portfolio of practical tips and techniques to draft contracts which meet your commercial objectives, and give you practical solutions to your drafting challenges.

<u>Please note:</u> When attending the online version of this course, participants are required to join with the ability to turn on their cameras. This is an essential requirement in order to fully participate in the training course due to the interactive nature of the programme.

Couldn't be better. I was hoping to gain a solid foundational understanding to help me when drafting or reviewing agreements. Not only did the webinar deliver on this, but my expectations were exceeded multiple timesthe content and explanations went far beyond what I anticipated. I particularly appreciated the multiple practical pieces of advice and real-life examples that were shared, as well as the overall value of the information received. On a scale 1-5. I would rate 10 if I could.
